

STREAM PRO | PLANNED SITE TREATMENT

Facilities-duty systems

Controlled equipment packages for planned work in hospitality, managed premises and commercial facilities.

CATEGORY DOCUMENT	MODEL STATUS
OPS-FAC	Selected after application review

Where this family fits

This document supports early product-family selection. Suitability and the final equipment model depend on the treatment context, materials, isolation, ventilation, operating window and responsible procedure.

- Hotels and hospitality
- Managed estates
- Commercial premises

Selection inputs

- Operational window
- Access-control arrangements
- Room and ventilation characteristics

Typical package scope

- Selected facilities-duty generator
- Approved model documentation
- Site operating checklist
- Specified access-control or monitoring accessories

Availability

Sales, project hire and multi-site support

TECHNICAL INFORMATION

Model data is supplied with the recommendation

The fields below are intentionally not populated at category level. Approved manufacturer documentation will be used for the selected model.

MANUFACTURER / MODEL	Confirmed in quotation
OZONE OUTPUT	Verified model value to be inserted
AIRFLOW	Verified model value to be inserted
ELECTRICAL SUPPLY / POWER	Verified model value to be inserted
DIMENSIONS / MASS	Verified model value to be inserted
CONTROLS / TIMER	Selected model configuration
SAFETY FEATURES	Selected model configuration and project controls
STANDARDS / CERTIFICATES	Relevant approved evidence to be attached

Controlled-use principles

- Documented treatment sequence
- Area signage and access controls
- Monitoring-compatible workflows

SAFETY NOTICE

Ozone is hazardous to health. Complete a suitable COSHH assessment, control access, follow the model instructions, ventilate after treatment and verify conditions before re-entry. HSE EH38 states a workplace exposure limit of 0.2 ppm averaged over 15 minutes.

Document status

General category datasheet for selection support. It is not a model manual, certificate, quotation, treatment procedure or completed technical submittal. Verify all critical data against the approved documents supplied with the selected model.
